

HYBRID WT CLEAR BASE

It is a water based printing base used to achieve an elastic and soft touching effect in textile printing. It can be used as a transparent or can be coloured with pigments. Does not dry during the print and block the screen

Highlights

- If used correctly as advised, the dry-wet rubbing and washing fastness are high. It provides elastic and soft touch prints
- Rubbing and washing tests should be applied 24 hours after curing.
- It is simple to print and it doesn't clog the screen.
- No need flash between colours.

Printing Tips

- It has been manufactured for wet on wet printing process.

Compliance

- Suitable to ecological standards.

Precautions

- It can be mixed with Hybrid WT White in any ratio.
- Before usage, please stir the product well. Do not use any additives that are not advised.
- After using, the screen should be cleaned with water and sponge.
- Soluble in water.
- It is packed in 10kg, 30kg and 60kg blue polyethylene cans.
- The technical application and information that have been given above, are designed only as using instructions. Should not be considered as a warranty for any other use. If any further help or assistance is required, our technical department is ready for help.
- In case of emergency, Safety Data Sheet of this product should be ready for help at the working area.
- The warnings available on safety data sheets have been written for the purpose of providing comprehensive information on the products & in case of any nonconforming usage can not be held responsible for any direct and/or indirect loss or damage of the manufacturer/distributor.
